DESIGNING PROCESS

Introduction

Innovative design is the core value of Team Active that means an excellent product could not live w/o innovations.

Active has been producing saddle for 40 years since 1972. Nearly half-century abounding experience in saddle manufacturing professions, that leads to maturity with the producing procedure & technology. Hence, Active decides to launch a brand-new series of ODM products to meet the varied customer demands.

ODM Concepts

Active ODM products Designs are particularly created according to the customers and marketing demands. The Team Active Designers give the concept of saddles by the property and the demands of the bicycles, that will make the ODM products with the most suitable design, material, stitching, printing & benefit, etc. for our customers.

ODM Product Designing process:

Active ODM Products are manufactured by a systemed industrial designing procedures, every connections are particular created from the specialized design & development in order to assure the best quality of the products and bring the customers' confidence with ACTIVE.

1. Idea Sketch:

sketching the original idea of the profile

2. Clay model (Reverse engineering):

Materializing the idea by molding a 3D clay for further studying and modification.

3. 3D model:

Creating a 3D curve into the computer and the confectioning construction of the plastic parts.

4. RP model:

Drawing the plastic parts by CNC machine to study the assembling.

5. Trial assembling:

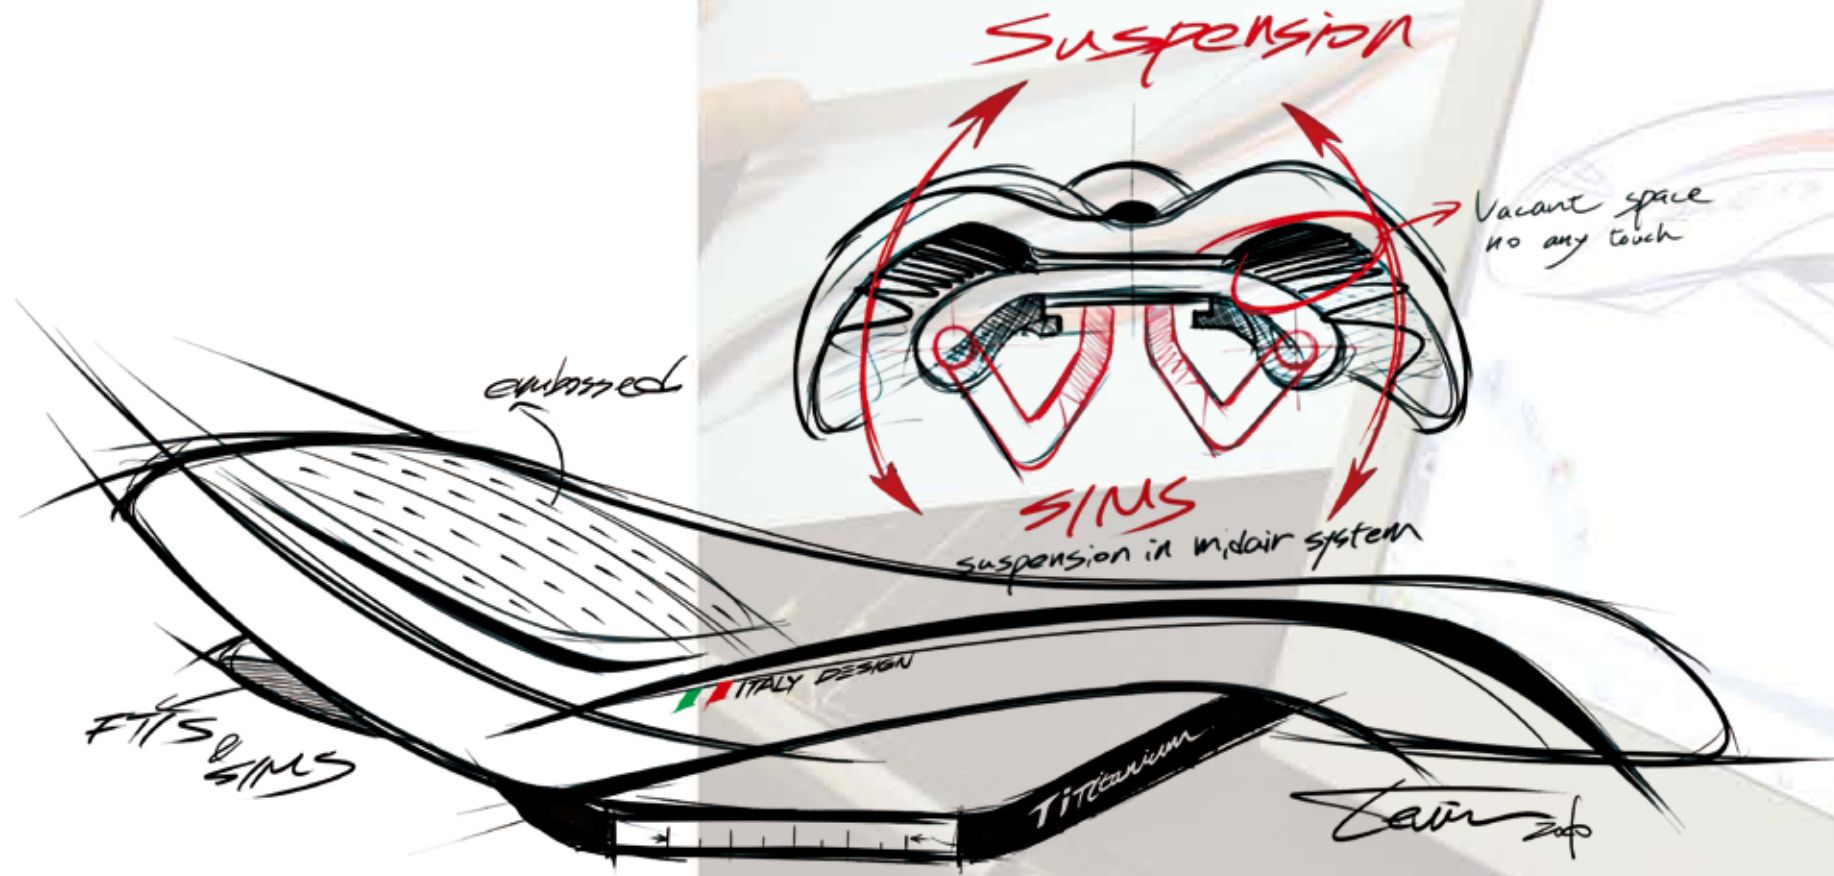

Double confirm the assembling connection of the creature.

6. Cover artwork designing:

Designing the artwork (i.e. embossment, printing) for the top cover to reach the perfect appearance.

SADDLE PADS

AG-021

Available use 3M reflective, more safety in traffic for rider.

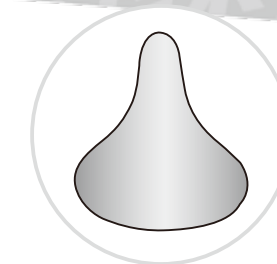

SINGLE GEL SADDLE PAD

Lycra cover conforms to gel material and saddle top for optimum fit.
Drawstring mounting system fastens cover securely to saddle.
Gel padding conforms to body contours for greater comfort.

SIZING: Gel Saddle Pads
